1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: the claim identifiers for Claims 42-45 of the amendment filed 1/5/06 have been changed from "(New)" to "(Previously Presented)".

2. The following is an examiner's statement of reasons for allowance: the closest prior art Hosking (USPN 2,409,759) teaches direct bonding of rubber to metal wherein the rubber may be preformed or premolded, and vulcanized either partially or completely, prior to its assembly with the metal piece to which it is to be secured, and thereafter bonding directly to said metal piece via heat and pressure without the use of tie gums, cements or like adhesives, wherein Hosking also teaches that a plurality of metal pieces may be bonded to the same rubber mass so that the rubber forms a link between the various metal pieces. Hosking does not teach or render obvious that the rubber mass resides in a state of compression in the absence of an external compressive force as instantly claimed. The Examiner further notes that neither Drake nor Nagel (*both cited in a related international search report*) teach that the cured rubber between the metal substrates resides in a state of compression in the absence of an external compressive force as instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
